SUMMARY

I am FrontEnd developer, strongly focused on creating user friendly web application based on HTML, CSS, JavaScript and React. I have experience of 4 months and made some projects .

PROJECTS

🔗 Namanganliklar24 | bx-cofferoaster | Applewatch | AnsorMed

- *Made Namanganliklar24 is a news site.* **It is made based on HTML and CSS** *In this project I faced some problems with margin and paddings however each problem was solved*
- *Developed a simple Cofferoaster is site about caffe. This site also uses HTML CSS technologies . In this site I faced problem with making arcon(dropdown) without JavaScript ,however I solved it with "details" element.*
- *Made a web Applewatch is a easier project.*

Education

Bachelor at Tongmyong University in South Korea(not complited: frozen)

My major was related to Business and IT integration
